

2 SHAFT DESIGN

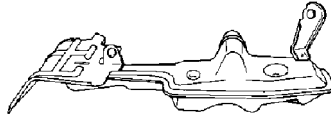

4/5 SPEED FWD w/L/U

ACURA, HONDA, STERLING - 4/5 SPEED

Typical
2/3 Shaft Type Filter

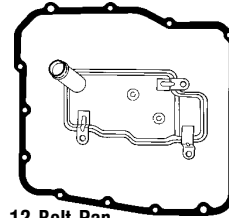

Typical
3 Shaft Type Filter

IMPORTANT NOTES

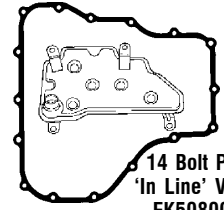

Honda & Acura have many versions of the 4/5 speed transmission. In addition to the transverse style mounting, they also have 'In Line' (engine) mounting in later years. To simplify identification, applications are detailed according to the various frictions' clutch sizes and are shown in a chart at the end of the Honda listing.

For Transmission Code to Vehicle Model I.D., see index.
For illustrations of all Acura/Honda filters, see end of Honda listing.

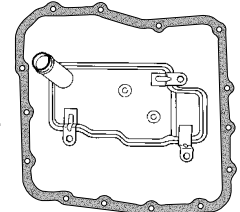

Honda Passport is a 4L30E. See index for parts listings.

(1) Accord SEI (F.I.) 1985 axle seals part no's. 50208 and 50209 are now in kit.

(2) Civic CRX, Integra 1986-87 require 12 thin steels (included in kits)

(3) Civic CRX, 1988-91, and Integra, 1988-89, require 3 thin steels (included in kits).

(4) Certain 96-Up models require .063 low hold steels (50101D) purchase separately. Kit contains .079 steels.

(6) To service 97-Up Prelude, purchase one 50106E friction & if needed six 50100Q steels for second clutch.

(7) If required, purchase along with K5000P/P-LS to service civic AWD.

See following page for additional listings.

Order Frictions with prefix for brand: 'B' for Borg Warner, 'R' for Raybestos, 'F' for F.C.C.										
Frictions and steels listed may fit various years, makes, models, and locations. They may also have several different OEM numbers to refer to. The clutches are listed by diameter, material, thickness, tooth count, and specific application information.										
Many later model frictions are a segmented "button" material design to eliminate waste and groove cutting procedures. Use a 'F' prefix when ordering to obtain the OEM friction from F.C.C. (Fuji Chemical). Physical descriptions are based on F.C.C. appearance. Other brands will differ.										
NOTE: All Friction and Steel quantities are AS REQUIRED . Seg = Segmented (Yes or No).
