IMPORTANT NOTES

This is a 3 Speed transmission. For 4 Speed, with similar model applications, refer to the Vehicle & Model Transmission Guide.

This transmission manufactured by JATCO was adapted to GM 'R' cars in 1985-Up. Some call it the MX-1 or KF100 for GM applications. Nova is also referred to as MX-1. The 85-Up Nova uses the A131L 3 Speed transmission, almost identical to the A131L Toyota Corolla transmission.
